Dear Mr Platts

Thank you for submitting your online estimate request.

We now have a basic understanding of which teeth you wish to have restored with dental implant based treatment.

Special Offer > If you book your clinical/suitability assessment appointment by the end of June 2014 and attend the appointment in June/July 2014 the assessment fee of £125 is refunded if you proceed with treatment at our clinic. If you would like an initial free consultation with the clinician before the clinical assessment please call **0800 542 2183**

Possible Implant Treatment Solution for You:

	UL7	UL6	UL5	UL4	UL3	UL2	UL1	UR1	UR2	UR3	UR4	UR5	UR6	UR7
Upper Jaw		IBR	IBR	IBR		ICR					IBR	IBR	IBR	
Lower Jaw		ICR	ICR											
	LL7	LL6	LL5	LL4	LL3	LL2	LL1	LR1	LR2	LR3	LR4	LR5	LR6	LR7

Estimate Treatment Cost

Estimated Treatment Fee | Standard Warrantee

£8,915

Estimated Treatment Fee | Extended Warrantee

£10,065

The estimate includes all implant components, standard abutments, implant placement surgery, medications, lab fees and the final restorations (crowns, bridges or overdentures). This is an estimate and a clinical assessment will be required to confirm the final fees. 2nd Molars (UR7, UL7, LR7 and LL7) are generally not restored unless the patient specifically wishes this. 3rd Molars/Wisdom teeth (UR8, UL8, LR8 and LL8) are not depicted as they are not restorable with dental implants. Please call 0800 542 2183 for warrantee information.

Key to Symbols:

ICR = Dental Implant with Final Crown | Restoring Individual Missing/Failing Teeth

The dental implant is the prosthetic tooth root placed into the jawbone under the gum. The abutment is the post that fits into the implant that the crown is then bonded to the abutment. If you have a few individual gaps to the upper and/or lower jaw this is usually the best solution.

IBR = Dental Implant Fixed Bridge | Restoring Multiple Missing Teeth in a Row and Full Jaw Cases

Not every missing tooth needs an implant when you have missing teeth in a row. Bridges can be fixed to dental implants for gaps of 2, 3, 4, 5, 6 teeth as well as for patients who have all the teeth missing to the upper and/or lower jaw.

- **The Clinical Assessment:** this assessment determines suitability for implant treatment. At the assessment you will receive a comprehensive oral examination, periodontal examination and oral hygiene assessment. The fee for the clinical assessment is £125 including the 3D CT scan and appropriate x-rays. Any scans or x-rays that are required during the course of treatment are **FREE**. The 3D CT scan is essential to determine bone height, width, volume and density. We do not feel that x-rays are sufficient for this purpose and prefer not to take unnecessary risks. Once the assessment has been completed you will receive your treatment plan with final fees.
- **Our implant clinicians are highly experienced and have UK post-graduate qualifications in implant dentistry. All treatment will be carried out by the clinician of your choice at the clinic you have chosen to attend.**
- **DentalCarePlus clinicians have treated over 10,000 patients since 2005, having placed and restored in excess of 25,000 implants. Many of these patients are referred from other dentists from around the UK.**
- **DentalCarePlus is a family owned and ethical group of implant clinics with locations in London (W1), Manchester, Bristol, Marlow (Bucks) and Cornwall.**
- **Sedation is available for patients who wish to have treatment carried out whilst sedated.**
- **Our standard standards far exceed the standards set out by the General Dental Council (GDC) and the Care Quality Commission (CQC).**

- **Exceptional Value without Compromise:** we purchase vast quantities of components and materials from leading UK, EU and US manufacturers at preferential costs; this enables us to offer treatment at exceptional value without compromising a very high standard of care. Expert clinicians, using the latest technology and clinical knowledge, evidence-based techniques, high quality components and materials and reputable UK based dental technicians; provide our patients with a long-term high quality and predictable result. Our standards far exceed the standards set out by the General Dental Council (GDC) and the Care Quality Commission (CQC).
